ASSEMBLY OF FANMATE® VENT COVER

1. Place FANMATE® Vent Cover Body on a flat surface.
2. Lay Louver section behind opening of vent cover body with tabs up as shown in Figure 1.
3. Slide oval shaped tabs on Louver section through the slots on the Vent Cover Body.
4. Rotate Louver section upward and snap into top of the Vent Cover Body. Make sure the Louver edge goes behind the tabs inside of the Vent Cover Body as shown in Detail A in Figure 2.
5. Be sure all three (3) snaps are secured and both oval shaped tabs remain in the slots as shown in Details B and C in Figure 2.
6. This concludes the Assembly of the FANMATE® Vent Cover. Please proceed to the INSTALLATION INSTRUCTIONS.

INSTALLATION INSTRUCTIONS FOR MAXXFAN® and MAXXFAN® Plus FANS WITH BUILT-IN Mounting tabs

1. Place FANMATE® over the four (4) mounting tabs on the MAXXFAN® with the louvers facing the rear of the vehicle. See Figure 3.
2. Slide the EZClip™ pins into place as shown in Figure 4. Rotate the EZClip™ pins upward to lock into position on top of the mounting tabs.

FEATURING EZClip™ by MAXXAIR® VENTILATION SOLUTIONS

LOS ANGELES, CA 2017
INSTALLATION INSTRUCTIONS FOR STANDARD ROOF VENTS AND MOST HIGH-POWERED FANS

1. Install two (2) brackets to one side of the FANMATE® using two (2) of the EZClips™ pins provided. See Figure 5.

2. With the louvers facing the rear of the vehicle, slide the FANMATE® up against the side of your roof vent or fan as shown in Figure 6. Center the brackets front to back on vent side wall.

A. FOR STANDARD ROOF VENTS:
   i. Mark the center of the slot of the brackets onto the side wall of the vent.
   ii. Drill a 3/16" hole at each mark through the side wall of the vent.
   iii. Fasten the brackets to the roof vent using the #8-32 screws with the fender washer, lock washers and nuts on the inside of the roof vent side wall. See Figure 7.

B. FOR FANTASTIC VENT OR SHURFLO FANS:
   i. Mark the two (2) outer holes of each bracket onto the side wall of your fan.
   ii. Drill a 3/32" pilot hole at the center of each mark. DO NOT drill more than 1/2" deep to avoid damaging internal wiring.
   iii. Fasten the brackets to the fan side wall using two (2) #6x1/2" long screws provided for each bracket. See Figure 8.

3. Close the FANMATE® and mark the location of the feet onto the roof on the opposite side. See Figure 9.

4. Line up the remaining two (2) brackets with the marks just made in step 3 on the roof as shown in Figure 9.

A. FOR STANDARD ROOF VENTS:
   i. Mark the center of the slot of the brackets onto the side wall of the vent.
   ii. Drill a 3/16" hole at each mark through the side wall of the vent.
   iii. Fasten the brackets to the roof vent using the #8-32 screws with the fender washer, lock washers and nuts on the inside of the roof vent side wall. See Figure 7.

B. FOR FANTASTIC VENT OR SHURFLO FANS:
   i. Mark the two (2) outer holes of each bracket onto the side wall of your fan.
   ii. Drill a 3/32" pilot hole at the center of each mark. DO NOT drill more than 1/2" deep to avoid damaging internal wiring.
   iii. Fasten the brackets to the fan side wall using two (2) #6x1/2" long screws provided for each bracket. See Figure 8.

5. Close the FANMATE® and slide the other two (2) clips into place as shown in Figure 10. Rotate the EZClips™ pins upward to lock into position on top of the mounting tabs.

This concludes the INSTALLATION. ENJOY YOUR NEW FANMATE® Vent Cover.

THE MAXXAIR® SOLUTION FOR RV VENTILATION

MAXXFAN and MAXXFAN Plus

INDUSTRY EXCLUSIVE MOUNTING TABS

► 2 YEAR® Limited WARRANTY with LIFETIME Limited WARRANTY® on lid

MAXXFANS are available in MANUAL, ELECTRIC or REMOTE CONTROL Opening Models

PLEASE VISIT AIRXCEL.COM FOR WARRANTY, MODEL INFORMATION AND SPECIFICATIONS *Warranty limited to repair or replacement

CAUTIONS AND CARE OF YOUR FANMATE®

This product has been manufactured using prime UV stabilized Polymers for maximum toughness and durability. However, the use of caustic or solvent based chemicals can cause cracking and product failure. PLEASE CLEAN ALL PARTS WITH MILD SOAP AND WATER ONLY. NOTE: Inspect the FANMATE® cover and EZClips™ or mounting brackets twice a year to insure a safe and secure installation is maintained.

NOTE: Most thermostatically controlled fan powered roof ventilators are designed to stop when contacting an obstruction such as a low tree branch, etc. This auto stopping feature is also used as the rain cover. When the vent lid automatically opens and contacts the canopy of the FANMATE® rain cover. When the vent lid is manually opened and contacts the inside of the FANMATE® cover it simply stops opening as it is designed to do. Then the fan, with its own separate motor, will start and run automatically.

Even though our FANMATE® cover prevents the fan lid from fully opening, most RVers agree - the small reduction in air flow is a worthwhile trade off to keep their RV interior safe and dry.
